

VIVEK G

Technical Program Manager

Bengaluru, India • vivekg.work@gmail.com • 9606619285 • [linkedin.com/in/vivek-g9606](https://www.linkedin.com/in/vivek-g9606)

SUMMARY

Technical Program Manager with 4+ years leading cross-functional engineering teams of up to 10 across 3–5 concurrent programs in SaaS, e-commerce, and enterprise platform environments. Drives end-to-end delivery, translates business requirements into technical roadmaps, and uses process re-engineering to cut cycle times — including a 95% reduction in turnaround time for a client-critical workflow. Pairs Agile program governance with hands-on technical fluency in the MERN stack, cloud infrastructure, and CI/CD to bridge engineering and business stakeholders.

CORE COMPETENCIES

Technical Program & Project Management • Cross-Functional Team Leadership • Agile / Scrum Delivery • Stakeholder & Executive Communication • Risk & Dependency Management • Release & Change Governance • Process Optimization • Vendor & Client Management • Cloud & DevOps (GCP, AWS, Docker) • Roadmapping & KPI Reporting

PROFESSIONAL EXPERIENCE

Solutions Specialist — Technical Program Management — Weberon Solutions *Oct 2023 – Present*

- Own end-to-end delivery for 3–5 concurrent digital transformation and platform modernization programs, coordinating cross-functional teams of up to 10 developers, designers, QA engineers, and external vendors.
- Redesigned a client-critical document processing workflow, cutting turnaround from 2.5 hours to under 30 seconds (95% reduction) through automation and root-cause elimination of manual steps.
- Run sprint planning, backlog grooming, and release management through OpenProject across all active programs, maintaining on-time delivery while managing scope, budget, and risk portfolio-wide.
- Directed migration of client applications to cloud-native, containerized, multi-tenant architectures, improving system reliability and reducing operational overhead for the delivery team.
- Built PMO-aligned governance frameworks — delivery dashboards, KPI tracking, audit-ready documentation — used in executive status reviews and compliance reporting.
- Serve as primary escalation point across client, engineering, and leadership stakeholders; lead change management and release approvals with zero unplanned rollback incidents.

Co-Founder — Wbzard Labs LLP *Jan 2023 – Sep 2023*

- Founded and scaled a digital product studio delivering web, e-commerce, and mobile solutions across multiple client industries, owning solution architecture and delivery planning end to end.
- Managed and mentored a team of 6 developers across concurrent client engagements, directly responsible for code quality, delivery timelines, and resource allocation.
- Delivered multiple client engagements, from e-commerce platforms to custom business applications, on time and within scope.
- Applied AI-assisted development and automation practices to accelerate delivery cycles, improving project margins and turnaround time for clients.

Project Engineer – Wipro

Feb 2022 – Jan 2023

- Delivered enterprise web application features within Agile sprints for large-scale clients, collaborating with product owners, backend engineers, and QA across release cycles.
- Built reusable, scalable UI components adopted across multiple project teams, reducing duplicate development effort and improving consistency.
- Integrated frontend applications with enterprise APIs, supporting responsive experiences across devices as part of cross-platform delivery.

PRODUCT & FOUNDER HIGHLIGHTS

Prformnce — Founder of a lead-intelligence SaaS built around Smart Form Endpoints, a QR Campaign Generator, and Engagement Analytics, helping SMBs and event organizers capture and understand leads in one workflow. Own the product roadmap, infrastructure, and go-to-market positioning end to end.
